

Lital Entin

Technical Product Professional | QA, AI & Product Development

PROFESSIONAL SUMMARY

QA and product professional with 7 years of experience across complex software systems, SaaS, mobile applications, and cybersecurity. Strong background in system integrations, technical investigations, and cross-functional collaboration. Alongside extensive QA experience, independently develops web and mobile solutions, combining product management, software development, and AI-assisted workflows. Creator of Bumpify, a mobile application developed and launched end to end.

EXPERIENCE

Software Development, QA & Product Management **FREELANCE | 2025 - present**

- Develop websites, landing pages, and mobile applications, covering requirements, implementation, testing, and deployment.
- Apply QA expertise to software validation, API testing, troubleshooting, and technical problem-solving.
- Manage product requirements, feature prioritization, UX decisions, and end-to-end delivery.
- Leverage Claude Code and AI-assisted workflows, including an API testing agent, to streamline development and testing.
- Bumpify | Founder & Product Lead - Independently developed and launched a mobile application available on the Apple App Store.
- Managed the full product lifecycle, from concept and requirements to UX, development, testing, and production release.
- Built and integrated mobile, backend, API, database, and cloud components using React Native, TypeScript, Python (FastAPI), and MongoDB.

Senior QA Engineer | PlaxidityX (Formerly Argus) - Automotive Cybersecurity 2024 - 2025

- Owned end-to-end quality validation for a complex cybersecurity platform, covering functional, integration, and regression testing across backend, client-server, and embedded systems.
- Investigated complex technical issues using logs, Wireshark, and network traffic analysis, performing root cause analysis and collaborating with R&D on solutions.
- Supported Agile release cycles using Python-based hardware simulators and Jenkins to validate system behavior, stability, and release readiness.

Earlier QA Experience | 2019 - 2024

Moon Active · SysAid Technologies · Orpak Systems

- Performed end-to-end, integration, regression, and system testing across mobile, SaaS, client-server, and real-time hardware-software systems, including production environments.
- Investigated complex technical issues using SQL, logs, APIs, and debugging tools, including Charles Proxy, Coralogix, and Kibana.
- Collaborated with Product and R&D teams on root cause analysis, defect resolution, and release validation, supporting system stability and production quality.

TECHNICAL SKILLS

- **QA field:** E2E, Integration, Mobile & Web, API & Regression Testing, Sanity, STP, STD, STR, Release Validation, Troubleshooting, Root Cause Analysis, HIL & SIL testing.
- **Product & AI:** Product Requirements, Feature Prioritization, AI-Assisted Workflows, Claude Code, Prompt Engineering.
- **Tools & Technologies:** Jira, Confluence, TestRail, Postman, Swagger, Charles Proxy, Wireshark, Jenkins, GitHub.
- **Systems & Data:** REST APIs, SQL, BigQuery, MongoDB, Python, Client-Server, SaaS, Windows, Linux.
- **Monitoring & Debugging:** Coralogix, Kibana, Logs & Network Analysis, Chrome DevTools.

EDUCATION

- Product Management Studies | Product Experts College | 2025-2026
- Automation Development Course | HackerU College | 2019
- Quality Assurance Engineer Course | HackerU College | 2019
